- Jane Iredale Camouflage Makeup

Our Team

Dr. Szeftel

Is a Harvard trained Physician who is an Associate Clinical Professor at UCLA. His interest in cosmetic medicine developed from a twenty year experience in laser surgery. He converted this experience and unique insight in laser tissue interactions to skin and cosmetic uses. Dr. Szeftel has published in the field of laser surgery and lectured in laser physics and laser safety.

Kristy Charlier

A native Australian has been involved in the Aesthetics industry for the last 10 years after initially completing a Health Science Degree. Gaining international accreditation she worked extensively around the world in upscale spa's and cosmetic medicine practices.

Natasha Price

Our Medical Office Assistant is on hand to assist in a number of the cosmetic procedures performed in the practice. She enjoys putting her organizational and customer service skills to use as well as developing her interest in the cosmetic aesthetic field

Denise Symonds

Is our friendly and helpful receptionist who just loves seeing immediate results from injectables and other rejuvenation procedures when people come to the desk after their treatment. She appreciates how these treatments change the way they feel about themselves and has witnessed this first hand.

A Unique Approach to Cosmetic Medicine

- Comprehensive, individualized approach to skin health.
- Emphasis on preventative, maintenance and corrective skin care.
- Honest and dependable advice from highly skilled staff.
- Provide only medically validated services using state of the art technology.
- Quality service at affordable prices.
- Physician consultation with every client.

“We are committed to helping not selling”

“Our goal is natural enhancement-beautifully.”

Practice Hours

Monday-Friday 9am-5pm.

After hours appointments may be available on request.

Parking

Parking is available and ticket will be validated at time of your treatment

Payment

Cash, Visa, Mastercard, Amex & Debit Cards

Erase Lines & Wrinkles

Botox® Cosmetic

Wrinkle relaxing injections which help to smooth out and prevent expression lines from forming. Botox blocks impulses from the nerve to the tiny facial muscles which cause laughter and worry lines. Used for treatment of frown lines, forehead lines, crow's feet, bunny lines & marionette lines. Botox will begin to take effect between 3-7 days with the effects lasting up to 4 months before the body naturally breaks down and excretes the protein.

Dermal Fillers (Juvederm, Restylane & Perlane)

Dermal fillers are used to plump and define lips, fill in deep folds, treat the hollowness under the eye's, add volume to cheeks and jaw line. Hyaluronic Acid is gradually lost from the skin due to the effects of aging and sun damage as a result sagging and creases develop. Injection of Hyaluronic Acid Gels (dermal fillers) such as Juvederm, Restylane and Perlane can effectively improve the contour and shape of the affected area. These fillers help to restore volume and tone as well as correcting wrinkles and folds. Results are individual and are expected to last 6-12 months depending on the area treated & choice of dermal filler.

Remove Hair

Permanent Hair Reduction

Laser treatment delivers unsurpassed results and is the most convenient and permanent solution to reducing unwanted hair. It is faster, relatively painless, precise and cost effective over time.

We use 3 State of the art hair removal systems

- The gold standard Alexandrite 755 for thick hair
- Nd:YAG 1064 for dark skin types
- IPL for thin hair and lighter skin

As hair grows in cycles several treatment sessions are required the frequency (usually 4-8 weeks apart) depending on the area treated.

Laser Treatment for Pseudo-Folliculitis

Pseudo-Folliculitis commonly known as razor bumps is an inflammatory condition which can cause discomfort among individuals with thick curly hair. At the time the laser is inactivating the hair follicle it reduces the razor bump inflammation and helps clear the condition.

Aesthetic Peels & Polishes

Chemical Peels

Chemical peels extensively exfoliate to accelerate the cell renewal process, stimulate collagen synthesis & improve elasticity in the dermis. They also calm, soothe, repair, nourish, and protect damaged skin, while lightening and brightening pigmented or sun damaged

skin, decongesting pores and regulating sebum, reduces redness and assists in drying out acne revealing a more youthful and radiant complexion.

This safe non-invasive procedure delivers results with little to no associated downtime. We have several different peels to suit all skin types and treat a range of skin conditions. Depending on the peel, they can be repeated weekly, bi-monthly or monthly. A consultation with a Medical Aesthetician is required to create a peel program along with an appropriate home care regime pertaining to your skin concerns and conditions.

Epidermal Leveling

An epi-blade is used to gently slough off dead surface skin cells and fine vellus hair. Used in conjunction with a superficial Pomegranate Peel to lighten and brighten the skin. It increases cell metabolism, protects from free radical damage leaving skin feeling soft, hydrated and glowing.

Cosmelan Depigmentation Treatment (Melasma)

A two step treatment and home care routine that uses active ingredients including five skin lighteners, antioxidants & plant extracts to treat stubborn pigmentation. Tyrosinase inhibitors block the production of melanin, while lightening epidermal pigmentation. Protects and neutralizes free radical & UV damage while gently stimulating collagen and elastin synthesis.

Microdermabrasion

Is a gentle but effective mechanical peeling of the skin to slough off dead surface cells and provide deep pore cleansing. It stimulates circulation initiating cellular turnover thus improving skin elasticity, texture, color and overall appearance. Microdermabrasion helps to diminish fine lines & wrinkles, superficial acne scarring, relieves blocked and enlarged pores, and sun damaged skin (lightens epidermal pigmentation) and improves dull lifeless skin.

All skin types can benefit from this treatment that can be done in your lunch hour, as there is no associated downtime. To enhance your treatment a mask may be applied or an ampule can be massaged into the skin depending on the specific skin condition that we are treating. We use the Crystal Free Diamond Tome, a market leader that is clean, safe, effective and particle free.

Laser & Light

We use a variety of laser and intense pulsed light systems each with unique features allowing us to more effectively treat a wide variety of skin problems.

CLARIFY	Rosacea
	Red Spots
	Spider veins on the face
